

Collaboration Made Easy

Improve performance and reduce costs with Inter-Tel® applications

AIG Technology, Inc.

Inter-Tel Web Conferencing Customer Since 2002.

“We are a software developer of workflow and workforce automation products.

Our sales focus is in the K-12 and higher education marketplace, groups where committee decision-making is commonplace.

We needed a solution to assist us with these types of complex sales environments and selected Inter-Tel Web Conferencing because it is easy to use. The customization capabilities of Inter-Tel Web Conferencing also enabled us to brand the application interface into our Web site design.

We've also offered the use of Inter-Tel Web Conferencing to our reseller channel. This gives them a tool to perform Web demos for prospects, while allowing us to train them without incurring additional travel expenses.

With Inter-Tel Web Conferencing, AIG Technology can communicate more, in less time and still maintain that 'personal touch' with our prospects, customers and reseller channel. I can't think of a business that would not want to better their communications and increase their velocity of doing business.”

Low Love

Director of Business Development, AIG Technology, Inc.

Inter-Tel Applications Deliver Real Performance

By creating a dynamic, real-time environment in which two or more people in different locations can interact, companies can streamline business processes, improve customer care, enhance employee productivity and reduce expenses.

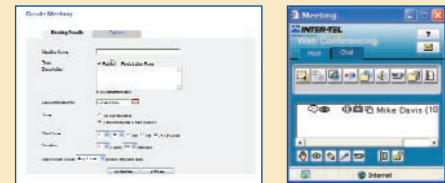

Inter-Tel addresses the needs of today's dynamic business environment by offering powerful applications that enable an enterprise to connect to internal and external resources with state-of-the-art solutions and technology. And we've been doing it for more than 35 years.

Inter-Tel Remote Support

Web-based, real-time tool that provides a simple way for sales and support professionals to quickly manage and resolve online PC support and demo requests via the Internet; helps increase productivity and lower operating costs.

Inter-Tel Web Conferencing

Enables real-time, interactive Web-based meetings with your audience by using a combination of desktop and application sharing; multi-point videoconferencing; keyboard and voice chat; file transfer; polling and quizzing; co-browse; and record and playback features.
