

Collaboration Made Easy

Improve performance and reduce costs with Inter-Tel® applications

The Sedona Group

Inter-Tel Web Conferencing Customer Since 2003.

“We’re primarily a staffing company; the corporate umbrella for 35 licensees nationwide.

Looking at the different mechanisms for facilitating training coast-to-coast, Inter-Tel Web Conferencing quickly rose to the top.

The flexibility of self-hosting became really clear. Service providers offering similar services demanded monthly fees, contracts and commitments and at the time, I had no idea if we were going to use it once a month, once a quarter or ten times a day.

We’ve been able to reach out to our offices across the country and provide training in a much more flexible and cost-effective environment than we could without a Web-based product.

The return on investment, the efficiency and time savings, it all comes down to that. It gives you a big bang for the buck. I really like that; it makes my life easier.”

David Buzzell

Chief Information Officer, The Sedona Group

Inter-Tel Applications Deliver Real Performance

By creating a dynamic, real-time environment in which two or more people in different locations can interact, companies can streamline business processes, improve customer care, enhance employee productivity and reduce expenses.

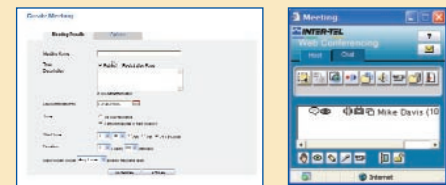

Inter-Tel addresses the needs of today’s dynamic business environment by offering powerful applications that enable an enterprise to connect to internal and external resources with state-of-the-art solutions and technology. And we’ve been doing it for more than 35 years.

Inter-Tel Remote Support

Web-based, real-time tool that provides a simple way for sales and support professionals to quickly manage and resolve online PC support and demo requests via the Internet; helps increase productivity and lower operating costs.

Inter-Tel Web Conferencing

Enables real-time, interactive Web-based meetings with your audience by using a combination of desktop and application sharing; multi-point videoconferencing; keyboard and voice chat; file transfer; polling and quizzing; co-browse; and record and playback features.
